California Offshore Wind Energy AB525 Fishing Community Engagement Meetings

June 2023 | Virtual (Zoom) and In-Person

The California Energy Commission (CEC) cordially invites you to a series of fishing community engagement meetings to inform the development of a Strategic Plan to guide California's development of offshore wind energy. Consistent with the requirements of Assembly Bill (AB) 525, these meetings will explore possible impacts to commercial and recreational fisheries associated with offshore wind development on California's central and north coasts, as well as the identification of suitable sea space to guide future planning. Participants will also be invited to share strategies for addressing these impacts.

Get involved by attending one of the scheduled meetings either in-person or virtual. You can RSVP for the virtual meetings via the links.

For more information, including how to register for the fishing community engagement meetings and access the webinar links, please visit the CEC webpage:
