

**The California Department of Fish and Wildlife  
Office of Spill Prevention and Response  
Overview in Eureka, California  
March 20, 2013**

Dear Colleagues,

You and your staff are invited to attend the California Department of Fish and Wildlife Office of Spill Prevention and Response (OSPR) Overview in Eureka, California on March 20, 2013. The general theme of the OSPR Overview is to provide local government agencies and stakeholders the opportunity to learn about OSPR and how we might coordinate and communicate if an oil spill occurred in California.

This interactive course is designed to provide OSPR, local government and stakeholders a unique opportunity to discuss and identify how our respective organizations will interact if an oil spill event occurs in California. Through this Overview, you will learn about the roles and responsibilities of the agency representative, social media tools and resources, beach/fishery closures, air monitoring, oiled wildlife operations, sensitive site protection strategies and priorities, 3<sup>rd</sup> party claims process, and the unique response resources available in California.

We encourage you to spend the day learning and sharing “what happens and what will need to happen” during all phases of a marine oil spill response, but are more than welcome to attend the presentations that best suit your organization’s interests (see agenda/flyer attached).

On behalf of the OSPR Overview Staff, we look forward to seeing you on March 20, 2013.

Kind regards,

OSPR Overview Coordinator,  
Cindy Murphy

# AN INVITATION
